

## A3 Medical Equipment

- Product design & prototype manufacturing
- Contract R&D service
- Facility analyzes & design
- Feasibility & financing
- Turn key projects
- Technology & know-how transfer
- Equipment & material supply
- Documentation & validation
- Start-up services & consultancy
- Service & repair and maintenance
- Customized & CE certified systems

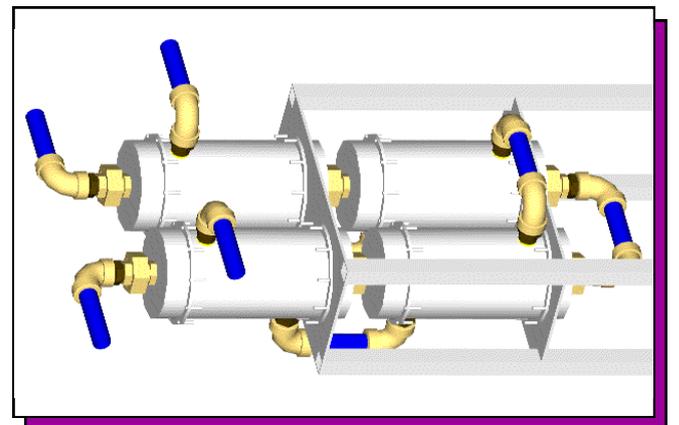

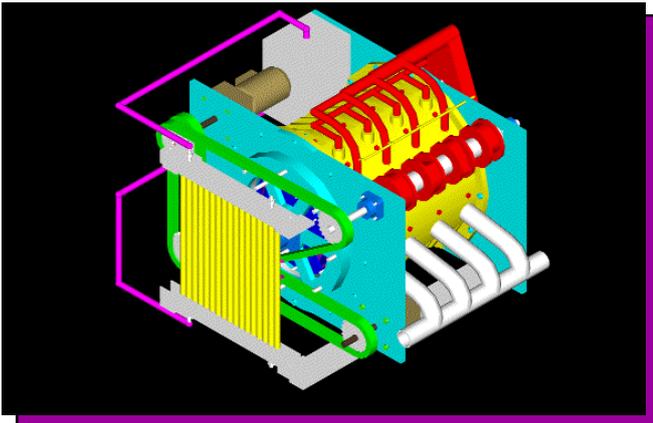

## A3 Medical Equipment;

A technology company established to produce and develop medical equipments and supplies.

Our company prepares projects, produces and develops any kinds of machines, equipments and supplies which are used in medicine and food industry.

Within the facility 12 Husky plastic injection machines in various sizes exist, hot and cold press, mould room, CAD-CAM metal supplies and montage units.

Our company cooperates with many of other companies in the same sector around the whole world and manufactures at high standards with CE quality certificate which is appropriate to E.U. legislation.

## Services

**Machine & process design**

**Designed to industrial and Medical standards**

**Module manufacturing facilities for food & medical products**

**Proprietary product design**

**Production line & machine positioning**

## Productions

- Turn key medical and food manufacturing facilities
- Robotic manipulators and automatic montage lines
- Sensitive polyurethane injection and dosing units
- Testing devices
- Analog – digital analysis
- Reactors for pharmaceutical manufacturing
- Mixture and dosing units
- Filtration, separation and splinter equipments
- Greaseless compressors
- Water and air preparation and conditioning units
- Pacing machines
- Software for production control
- Reporting systems

### A3 Medical Equipment; Machine manufacturing facility

Any kinds of machines and parts, design, development, mechanic electricity and electronic production and montage are being made in A3 Medical Devices which are essential for manufacturing food production, plastic disposable material, medicines and medical devices.

Robotic machines with capability to report and advanced level structural unemployment are being produced in A3 Medical Devices manufacturing facility.

Machines are produced in our facility is manufactured as being convenient to legislation for Health and Food companies have to obey and U.N. standards.

The software's for PLC, PC controlled which uses in Machines and production following and control are also produced in our facility.

### A3 Medical Equipment; Plastic manufacture

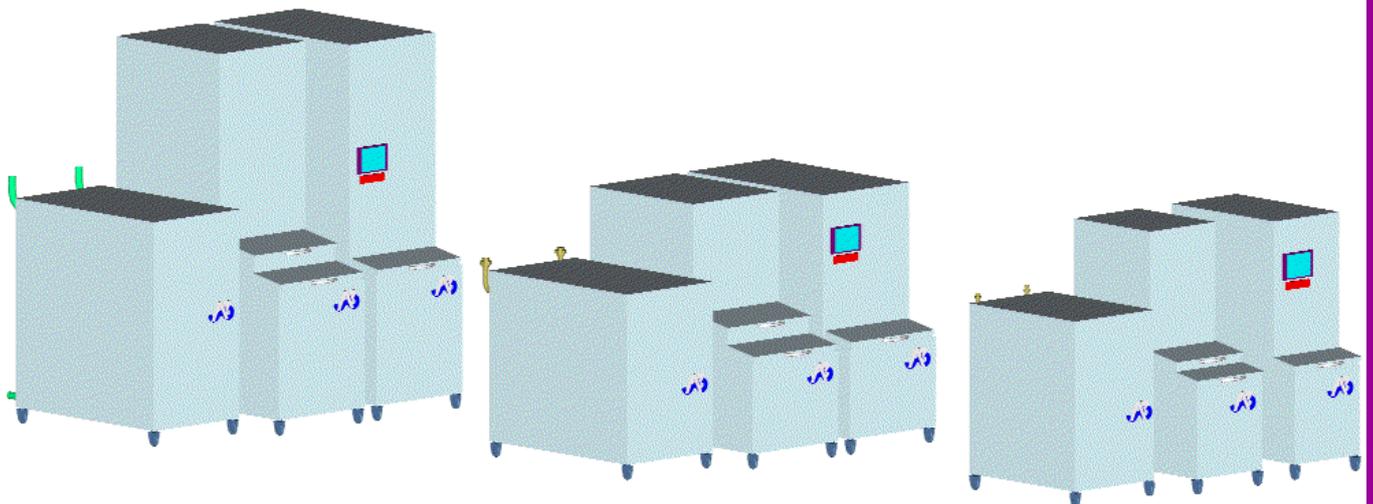

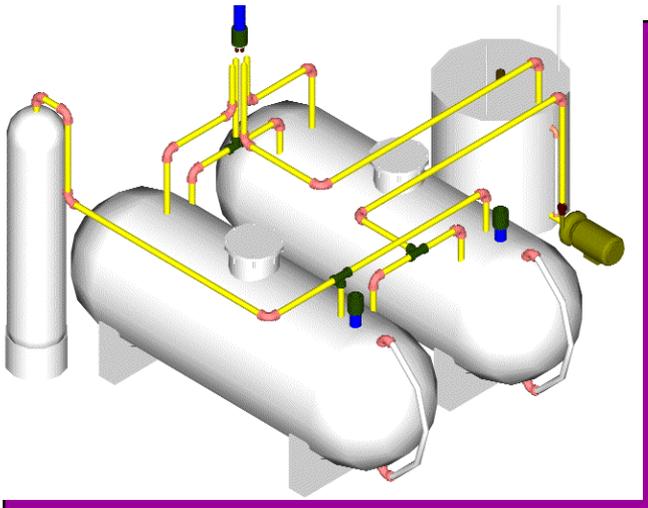

A3 Medical Equipment manufactures medical plastic and silicon consumable material and machine part under the conditions of legislations with 12 HUSKY plastic injection machines and presses.

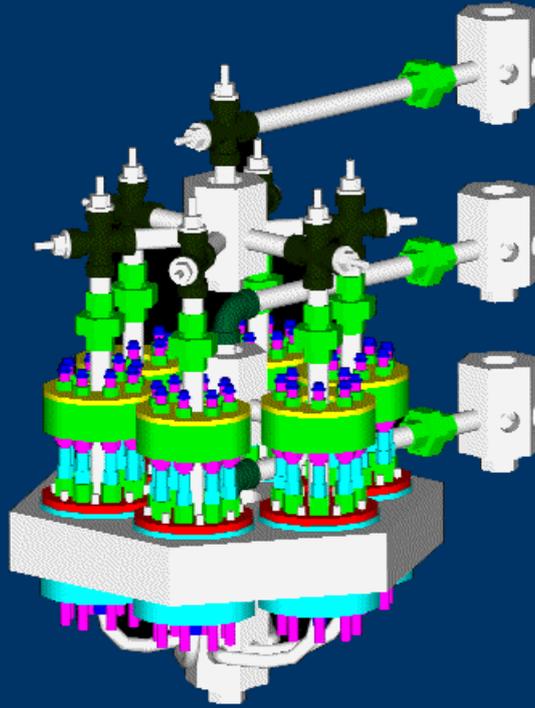

Our facility consists of program controlled high speed and sensibility machines which prevent oil and hydraulics contamination to productions.

Materials are compatible to GAMMA according to biocompatible and sterilization types are used in any steps of production.

In accordance with its purpose, the products are being checked by means of quality and are being packed in hygienic conditions.

Our facility is an establishment with CE certified which manufacture so far as 93/42/EEC Medical Devices legislation and ISO 13485 standards.
